Swing-out Controls

When you need a compact stump cutter with the go-anywhere traction and flotation that only tracks can provide, the Trac Jr is your solution. This all-new design from RAYCO raises the bar for compact stump cutters by offering a small machine that is truly full-featured. Rubber tracks provide excellent traction and ground pressure of less than 4psi. Huge, 47-inch cutting width tackles big stumps and a hydraulic backfill blade makes easy work of clean-up. A RAYCO-exclusive swing out control station provides excellent visibility of the cutting action while swinging forward to travel through gates. Available with a custom trailer.

Rubber Track Undercarriage
